Operating System

iOS 27

iOS is the world's most personal and secure mobile operating system, packed with powerful features and designed to protect your privacy.

Privacy

iPhone is built from the ground up to protect your personal information. Every iPhone has secure authentication. Apps need your permission to track your activity across other companies' apps or websites. Your iMessages and FaceTime video calls are encrypted end-to-end. And much more.

Learn more about privacy features ›

Accessibility

Built-in accessibility features supporting vision, mobility, hearing, speech and cognitive needs help you get the most out of your iPhone — in the ways that work best for you.

System Requirements

Apple Account (required for some features)

Internet access[18]

Syncing to a Mac or PC requires:

- macOS Catalina 10.15 or later using the Finder
- macOS High Sierra 10.13 through macOS Mojave 10.14.6 using iTunes 12.8 or later
- Windows 10 or later using iTunes 12.12.10 or later (free download from apple.com/in/itunes/download)

Environmental Requirements

Operating ambient temperature: 0° to 35° C (32° to 95° F)

Non-operating temperature: –20° to 45° C (–4° to 113° F)

Relative humidity: 5% to 95% non-condensing

Operating altitude: tested up to 3,000 m (10,000 ft)

Languages

Language support

English (Australia, UK, US), Chinese (Simplified, Traditional, Traditional – Hong Kong), French (Canada, France), German, Italian, Japanese, Korean, Spanish (Latin America, Spain), Arabic, Bulgarian, Catalan, Croatian, Czech, Danish, Dutch, Finnish, Greek, Hebrew, Hindi, Hungarian, Indonesian, Kazakh, Malay, Norwegian, Polish, Portuguese (Brazil, Portugal), Romanian, Russian, Slovak, Swedish, Thai, Turkish, Ukrainian, Vietnamese

Documentation

iPhone and the Environment

See the iPhone Duo Product Environmental Report (PDF) ↗

Progress towards Apple 2030

Apple 2030 is our goal to be carbon neutral across our value chain. We design our products to be less carbon intensive by prioritising the use of recycled and renewable content and low-carbon materials while focusing on the energy efficiency of our software and hardware.

See Apple's commitment ›

Materials

iPhone Duo is made with 35% recycled content,[19] including:

- 100% recycled aluminium in the internal structural frame
- 100% recycled cobalt in the battery
- 100% recycled gold plating and tin solder in all Apple-designed printed circuit boards
- 95% recycled lithium in the battery
- 85% recycled titanium in the enclosure
- 100% recycled titanium in the 3D-printed hinge cover

Packaging

- 100% fibre-based packaging[20]

Energy

- 60% of manufacturing electricity for iPhone Duo is sourced from renewable electricity[21]
- Exceeds US Department of Energy requirements for battery charger systems[22]

Waste

- No established final assembly sites generate waste sent to landfill as part of Apple's Zero Waste Programme[23]

Smarter chemistry[24]

All of the materials used in Apple products, accessories and packaging are covered by the requirements of our Regulated Substances Specification, which was one of the first in industry to restrict the use of key substances of concern. See the latest Environmental Progress Report to understand Apple's recent efforts in phasing out these chemistries.

Trade in your smartphone for credit.

With Apple Trade In, you can get credit towards a new iPhone when you trade in an eligible smartphone.[25] It's good for you and the planet.

*Listed pricing is Maximum Retail Price (inclusive of all taxes).

‡Includes instant cashback and No Cost EMI.

No Cost EMI is available with the purchase of an eligible product made using qualifying cards on 3- or 6-month tenures from most leading card issuers. Monthly pricing is rounded to the nearest rupee. Exact pricing will be provided by your card issuer, subject to your card issuer's terms and conditions. Minimum order spend applies as per your card issuer's threshold. No Cost EMI is not available to business customers and cannot be combined with Apple Store for Education or Corporate Employee Purchase Plan pricing. Card eligibility is subject to terms and conditions between you and your card issuer. Offer may be revised or withdrawn at any time without any prior notice. Terms apply.

Instant cashback is available with the purchase of an eligible product with qualifying American Express, Axis Bank and ICICI Bank cards only. Minimum transaction value of ₹10001 applies. Click here to see instant cashback amounts and eligible devices. Instant cashback is available for up to two orders per rolling 90-day period with an eligible card. Card eligibility is subject to terms and conditions between you and your card issuer. Total transaction value is calculated after any trade-in credit or eligible discount is applied. Any subsequent order adjustment(s) or cancellation(s) may result in instant cashback being recalculated, and any refund may be adjusted to account for instant cashback clawback; this may result in no refund being made to you. Offer may be revised or withdrawn at any time without any prior notice. Additional terms apply. Instant cashback is not available to business customers and cannot be combined with Apple Store for Education or Corporate Employee Purchase Plan pricing. Multiple separate orders cannot be combined for instant cashback.

**To identify your iPhone model number, see support.apple.com/en-in/108044. For details on 5G and LTE support, contact your carrier and see apple.com/in/iphone/cellular. Cellular technology support is based on iPhone model number and configuration for GSM networks.

1. Available space is less and varies due to many factors. A standard configuration uses approximately 12GB to 24GB of space, including iOS 27 with its latest features and Apple apps that can be deleted. Apple Intelligence on-device models use approximately 7GB of space and can be deleted if Apple Intelligence is turned off. Turning on Apple Intelligence will download the models again. Apple apps that can be deleted use about 4.5GB of space, and you can download them back from the App Store. Storage capacity is subject to change based on software version, settings and iPhone model.
2. Size and weight vary by configuration and manufacturing process.
3. Coming later this year.
4. iPhone Duo is splash, water and dust resistant, and was tested under controlled laboratory conditions with a rating of IP68 under IEC standard 60529 (maximum depth of 6 metres up to 30 minutes). Splash, water and dust resistance are not permanent conditions. Resistance might decrease as a result of normal wear. Do not attempt to charge a wet iPhone; refer to the user guide for cleaning and drying instructions. Liquid damage is not covered under warranty.
5. Apple Intelligence is available with Siri and device language set to Chinese (Simplified), Chinese (Traditional), Danish, Dutch, English, French, German, Italian, Japanese, Korean, Norwegian, Portuguese, Spanish, Swedish, Turkish or Vietnamese. Some features may not be available in all regions or languages. Some devices may not be available in all regions. Siri AI is available in beta in iOS 27 and requires an Apple Intelligence–enabled device set to a supported language. Available in English to start. Siri AI will not be initially available in the EU on iOS. Certain Apple Intelligence features that rely on server-side models are subject to daily usage limits, including but not limited to Siri AI, Intelligent Photo Editing Tools, Image Playground and AFM 3 Cloud models in Shortcuts. Daily limits may vary by feature, request complexity, system demand, system policies and other factors. Expanded access to such features will be available for a fee in the future. Use of these features is subject to the Apple Intelligence Terms and Conditions. Learn more at apple.com/in/apple-intelligence.
6. Testing conducted by Apple in August 2026 using preproduction iPhone Duo units and software, subscribed to LTE and 5G carrier networks, using a representative usage profile. Profile is based on the median usage values across iPhone users and reflects a combination of passive and active use of a variety of applications, including but not limited to messaging, photos, music, social media, video streaming, games, web browsing and navigation. iPhone Duo typical use based on equal usage between inner and outer displays. Battery life varies by use, configuration, cellular network, signal strength and other factors; actual results may vary based on usage.
7. Testing conducted by Apple in July 2026 using pre-production iPhone Duo units and software, subscribed to LTE and 5G carrier networks. Video playback consisted of a repeated 2-hour 23-minute HDR movie purchased from the iTunes Store. Video playback (streamed) consisted of a repeated 3-hour 1-minute HDR movie purchased from the iTunes Store. All settings were default except: Bluetooth was paired with headphones; Wi-Fi was associated with a network; the Wi-Fi feature Ask to Join Networks, Auto-Brightness and True Tone were turned off.

8. Testing conducted by Apple in July 2026 using pre-production iPhone Duo units and software, and either USB-C Charge Cable or Apple MagSafe Chargers (1-metre Model A3502 and 2-metre Model A3503), both with Apple 40W Dynamic Power Adapter with 60W Max (Model A3351). Wired fast charge supported with 60W-capable (or higher) USB-C cable and USB PD power adapters. Fast-charge testing conducted with drained iPhone Duo units in open configuration. Times measured from the appearance of the Apple logo as the unit started up. Charge time varies with adapter, settings, usage and environmental factors; actual results will vary.
9. iPhone Duo, iPhone 18 Pro, iPhone 17e, iPhone 17 and iPhone Air can detect a severe car crash, and call for help. Requires a cellular connection or Wi-Fi calling.
10. Data plan is required. 5G, Gigabit LTE, VoLTE and Wi-Fi calling are available in selected markets and through selected carriers. Speeds are based on theoretical throughput and vary based on site conditions and carrier. For details on 5G and LTE support, contact your carrier and see apple.com/in/iphone/cellular.
11. Wi-Fi 7 is available in countries and regions where supported.
12. Ultra Wideband availability varies by region.
13. USB 3 cable with 10 Gbps speed is required.
14. iPhone Duo is activated with an eSIM and does not support a physical SIM. Use of an eSIM requires a carrier that supports eSIM and a wireless service plan. See your carrier for details. To learn more, visit support.apple.com/en-in/HT212780.
15. FaceTime calling requires a FaceTime-enabled device for the caller and recipient and a Wi-Fi connection. Availability over a cellular network depends on carrier policies; data charges may apply.
16. Standard dynamic range video content only.
17. Siri may not be available in all languages or in all regions, and features may vary by region. Internet access is required. Cellular data charges may apply.
18. Wireless broadband is recommended; fees may apply.
19. Product recycled or renewable content is the mass of certified recycled material relative to the overall mass of the device, not including packaging or in-box accessories. Recycled and renewable plastic content calculation includes mass balance allocation.
20. Breakdown of US retail packaging by weight. Adhesives, inks and coatings are excluded from our calculations of plastic content and packaging weight. Fibre sourcing requirements are defined in Apple's Responsible Fibre Specification. We consider wood fibres to include bamboo.
21. We estimate the percentage of electricity-related emissions in our manufacturing that is sourced from low-carbon electricity by attributing to our carbon model low-carbon energy procured by our suppliers in the prior fiscal year, based on the supplier manufacturing allocations at time of product launch. Included in this number is only low-carbon electricity that Apple or its suppliers have procured as part of Apple's Supplier Clean Energy Programme.
22. Efficiency performance is based on the US Department of Energy Federal Energy Conservation Standards for Battery Chargers.
23. All established final assembly supplier sites — those that have been Apple suppliers for more than 1 year — for iPhone Duo is third-party verified as Zero Waste by UL LLC (UL 2799 Standard). UL requires at least 90% diversion through methods other than waste to energy to achieve Zero Waste to Landfill (Silver 90–94%, Gold 95–99% and Platinum 100%) designations.
24. Apple's Regulated Substances Specification describes Apple's restrictions on the use of certain chemical substances in materials in Apple products, accessories, manufacturing processes and packaging used for shipping products to Apple's end-customers. Restrictions are derived from international laws or directives, regulatory agencies, eco-label requirements, environmental standards and Apple policies. Every Apple product is free of PVC and phthalates except for AC power cords in India, Thailand (for two-prong AC power cords) and South Korea, where we continue to seek government approval for our PVC and phthalates replacement. Apple products comply with the European Union Directive 2011/65/EU and its amendments, including exemptions for the use of lead such as high-temperature solder. Apple is working to phase out the use of these exempted substances for new products where technically possible.
25. Mac, iPad and Apple Watch trade-in is available only in-store in India. Apple Retail Online in India does not offer trade-in for Mac, iPad and Apple Watch. Trade-in values will vary based on the condition, year and configuration of your eligible trade-in device. Not all devices are eligible for credit. You must be at least the age of majority to be eligible to trade in for credit. Trade-in value may be applied towards a qualifying new device purchase. Actual value awarded is based on receipt of a qualifying device matching the description provided when estimate was made. Sales tax may be assessed on full

value of a new device purchase. In-store trade-in requires presentation of a valid photo ID (local law may require saving this information). Some stores may have additional requirements. Apple or its trade-in partners reserve the right to refuse, cancel or limit the quantity of any trade-in transaction for any reason. More details are available from Apple's trade-in partner for trade-in and recycling of eligible devices. Restrictions and limitations may apply.

Features are subject to change. Some features, applications and services may not be available in all regions or all languages, and may require specific hardware and software. For more information, see Feature Availability.
